November 1, 2010

TO OUR VALUED CUSTOMERS:

Enclosed please find a new RectorSeal® price sheet effective December 1, 2010. It has been two years since we have changed our price sheet. Since then we have added several new products and deleted certain other ones. As you can see some prices have increased slightly while others have remained the same or even decreased. Overall the average increase is around 3%.

One notable change is with our line of PVC Solvent Cements. In order to help the environment we have switched all of our PVC Solvent Cements to the new LOW VOC type. This change will be effective the first of December, 2010. Some other new products include: Metacaulk® Pass Through Devices, Industrial Cable Coatings, Delta Deck Plugs, Turbo-Kleen™ A/C system flush, Mighty-Pump™ for cleaning clogged condensate drain lines, and Rectorseal® wire pulling tools.

As always, we like to provide our customers with advanced notice of any price changes so they have time to replenish their stock before new prices go into effect. Therefore, all orders received before December 1, 2010 for immediate shipment will receive current prices, and all orders received on or after December 1, 2010 will automatically receive new prices.

Thank you for your business.

Sincerely,

RECTORSEAL
