Subject: Drains Price Increase

Effective Date: January 17, 2011

Due to continued increases in raw materials we will be increasing all Watts drains prices by 8%, effective January 17, 2011.

Raw material costs have climbed throughout the year, with some materials increasing in excess of 30%. While Watts has absorbed these costs throughout the year we are now forced to pass them on.

Projects that are on-going, or have already been committed to on pricing will be protected for a period of 90 days. If you have any questions on drains pricing please contact your Commercial Sales Manager or Regional Director of Sales.

Thank you for your continued support.
